RANDIVE COMPLETES DISPLACEMENT OF APPROXIMATELY 40,000 CUBIC FEET OF BOTTOM MATERIAL AT THE PHILADELPHIA NAVY YARD IN TWENTY DAYS

At the end of February, Randive was requested to perform a bottom profile inspection in order to determine if any high spots existed in way of a berthed vessel. Upon preliminary inspection and after correcting to MLW datum, two areas were discovered which did not meet the depth requirements of the vessel. The Randive team was asked for any possible solutions due to contractual and time constraints. It was determined in order to meet the required depth requirements that approximately 30,000 cubic feet of material would be required to be displaced and not removed due to permitting / dredging issues. It was determined to displace the bottom material under the existing pier utilizing large 6" submersible pumps which were handled by our divers by hand. Upon commencement the four man dive team assembled long running lengths of hydraulic hoses and discharge hoses aided by our 5 ton International 4900 Crane truck which was mobilized to the job site in addition to our 20' float stages to aid in the pumping arrange-

SHIPPING 2009 WAS A HUGE SUCCESS FOR US! THANKS TO ALL WHO VISTED OUR STAND!

Over the three day period between March 23rd thru March 25th, we had the pleasure of meeting so many of you that we have worked with over the years in addition to meeting so many new contacts. It truly was a pleasure MEETING YOU ALL! and we look forward to seeing you all again in 2010 where we will be at the same exact stand location; thank-you Lorraine! We hope every one of you got a little something; be it a giveaway or information that you may not have known about us. Our grand prize of an Ipad Touch was won by Taylor Peterson of the Massachusetts Maritime Academy, ...CONGRATULATIONS TAYLOR!

In addition, our large custom dive trailer for extended jobs such as this one was also mobilized. Once on-site the dive team of Michael Smits, David Lamon, Peter Thierry and Jason Ballantyne commenced setting up an underwater grid in order to accurately document the progress and exact location of material moved. Over the allocated period of 20 days over 40,000- cubic yards of material was moved which was enough to meet or exceed our clients depth requirements. In addition and more importantly; the entire project was performed without incident with all safety regulations being adhered to. It was a very demanding project and a job well done to all involved.

RANDIVE'S JOKE OF THE MONTH

A sailor, ran aground on a sandbar. A passing fisherman offered to tow the sailor's boat off the bar for fifty dollars and the sailor agreed.

After he was off the bar, the sailor joked that at fifty dollars a pop the fisherman could make a nice living pulling people off the sandbar day and night."

"Can't at night," replied the fisherman.
 "At night I haul sand."

RANDIVE COMPLETES BOTTOM PROFILE INSPECTION WITH LABORATORY ANALYSIS OF BOTTOM SEDIMENT FOR UTILITY COMPANY

In the end of March, Randive was awarded a contract to perform a bottom profile inspection complete with an analysis of the bottom sediment for a very large local utility company. The survey was comprised of obtaining sediment depth's throughout the forebay and afterbay areas. Once the sediment profile was obtained and documented, numerous sediment samples and composites were required to be obtained and cross-referenced with the established bottom profile diagrams. The required containers which were

utilized had to be certified clean and a chain of custody established. The subcontracted laboratory picked up the samples and were then tested for numerous contaminants such as heavy metals, pesticides and PCB's. The results came in as clean and as is such the second phase of the project which will be sediment removal can commence. All of the work was performed in the required time period and to the satisfaction of our client.

RANDIVE TO PARTICIPATE IN THE CMA & SMPE GOLF TOURNAMENTS APRIL 30th & SEPTEMBER 14th, 2009

On April 30th, Randive will be participating in the CMA Spring Golf Outing. The "Simple Scramble Format" will be played at the Sterling Farms Golf Course in Stamford, CT. We will post the results of our foursome in our next newsletter! Then on September 14th, we will once again be playing in the SMPE outing as well. This outing will be played at the Apple Ridge Country Club located in Mahwah, NJ. Randive, Inc. will not only be participat-

ing, we will also be sponsoring tees and greens. We are also pleased to announce that we will be giving out a sleeve of three golf balls to each participating golfer in each tournament. The balls will be Top-Flite XL 5000 Super Long's complete with Randive logo! Good luck to all golfers and we will see you all at the dinner afterwards !

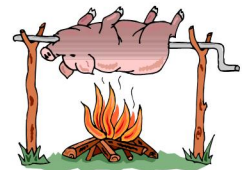

***REMINDER* RSVP'S APPRECIATED FOR MAY 21, 2009**

RANDIVE TO HOST TWO SOCIETY OF MARINE PORT ENGINEER EVENTS

Randive will be hosting a field trip for the Society of Marine Port Engineers on May 21st, 2009. We will be doing a complete pig roast with all the trimmings for all who attend. We will be having a Pig Cooking Throw-down with two of our divers, we will pick three judges the day of the cook off to determine a winner. In addition,

we are going to be, once again, hosting our annual summer outing to our usual picnic grove in Pomona, N.Y. We will be combining our outing with a new SMPE summer outing. It is always a lot of fun with softball, volleyball, bocce, swimming, horseshoes and many other activities played throughout the day. Of course there is

plenty of good barbeque and spirits all day, as well. If interested email us at divingservices@randive.com or call the SMPE office at 732-389-2009 or Kurt at 732-324-1144 for more details.

RANDIVE AWARDED AND COMPLETES USCG & ABS SURVEY ON THE TRAINING SHIP KENNEDY IN THE CAPE COD CANAL AT THE MASSACHUSETTS MARITIME ACADEMY FOR MARAD

Completing the bow area

Randive, Inc. was awarded a contract to perform a survey on the T/S KENNEDY in order to synchronize their ABS & USCG in-water surveys. In order to perform the required inspection the work was needed to be per-

formed at the vessels berth which is situated directly on the Cape Cod Canal. All work was needed to be performed during slack water periods only; as the maximum tide flow approached 4 knots. The required in-water survey was completed in six slack water periods over a period of four days. The preliminary safety meeting and orientation was started on Monday April 13th with the first dive being performed that same afternoon. The final slack water period which was needed to

complete the survey, was performed on Thursday the April 16th. All work was performed to the satisfaction of all interested parties and well within the allocated budget and timeline.

Diving operations set-up on the bow of the T/S "KENNEDY"

COME VISIT US AT MARINE LOG'S TUG & BARGES EXPO AT THE STAMFORD MARRIOT, STAMFORD, CONNECTICUT

For the second consecutive year Randive will be attending the TUGS & BARGE Executive Conference & Expo, which is sponsored by Marine Log. This Expo is now in its sixth year and will offer insight into the dynamic coastal tug & barge market. If you have plans to attend, come visit us in order to talk, pick up some of our giveaways, and enter our

raffle. If you have any questions regarding our services either Kurt, Bob, or Keith will be there to answer them. The venue for this show will once again be @ the Stamford Marriot. We look forward to seeing you all there.

THE CAPTAIN OF THE SEA BY: KATHERINE SMITH MATHENEY

Dear souls upon the stormy sea, There beams a light for all to see. The clouds will roll and thunder sound, Just trust in God while homeward bound. He won't forsake or turn away, He'll guide you safely home some day. You sailors all must trust in Thee For He's the Captain of the sea. He is the one who calms the storm The One who keeps you safe and warm. Though waters deep as they can be He walks upon the stormy sea. The lighthouse on the distant shore Will guide your ship — you'll be safe once more, But don't forget who holds the key — The Captain of the stormy sea.
